(2) Reason for issuing

Concerning the full-year consolidated financial results for the fiscal year ending March 31, 2022, operating income, ordinary income and net income attributable to owners of the parent company are expected to fall below the previous forecast due to higher transportation and raw material expenses and lower customer production volumes caused by the semiconductor and resin shortages mainly in the Automotive Products business.

Given this, the full-year financial forecast announced on November 4, 2021 was revised as indicated above.

(Note)

The above forecasts are based on assumptions in light of the information currently available at the time of announcing this material and are subject to a number of uncertainties that may affect future results.

Please note that actual results could differ from the current forecast due to various factors in future.
