Driving our Group forward with enthusiasm and energy, to further strengthen the Furukawa Electric brand.

The Furukawa Group’s Corporate Philosophy is “Drawing on more than a century of expertise in the development and fabrication of advanced materials, we will contribute to the realization of a sustainable society through continuous technological innovation.” Since its establishment in 1884 up until today, the Furukawa Group has treated the transmission, connection, and accumulation of energy, information, and heat as the fundamental pillars of its business. Based on these concepts, it has deployed a wide variety of products throughout the world in fields that include telecommunications, energy, and other forms of infrastructure, as well as automotive products and electronics, focusing on its three advanced material specialties of metals, photonics, and polymers.

Currently, our “Furukawa G Plan 2020” medium-term management plan is underway, with the 2020 fiscal year designated as its final year of operation. As our world undergoes tremendous changes at an unprecedented speed, we will continue to carry out reforms without slowing our pace, and will provide all of our stakeholders with a firm sense of security and high expectations. To do so, we will uphold our slogan of “Passion, Persistence, Pride”, driving our Group forward with enthusiasm and energy to further strengthen the Furukawa Electric brand.

We sincerely thank all of you for your continuing and future support.

President

Kei. Kobayashi.
