Notice of Partial Damage to Plant Buildings at Nikko Works Caused by Record Snowfall

Damage was caused by the record snowfall experienced last weekend, including the collapse of roofing on some plant buildings, at Nikko Works (Nikko City, Tochigi Prefecture), which manufactures wrought copper products, such as copper alloy strips.

1. Time and place

Time: Morning of Saturday, February 15, 2014

Place: Nikko Works (500, Kiyotaki-machi, Nikko-shi, Tochigi Prefecture)

2. Status of damage

No personal injuries were suffered. Damage of the roof collapse was caused at some plant buildings. Additionally, all operation was stopped by electric outage.

This moment, it is unclear the reintegration of operation and amount of damage.

3. Impact on results

At the current stage it is unclear what the impact of the above damage will be on the consolidated results of Furukawa Electric Co., Ltd. A prompt disclosure will be made in the case that a major impact on results is expected.
